Damage to Cotton due to Heliothis and White Fly Pests

2802. SHRI SHIV PRATAP MISHRA: Will the Minister of AGRICULTURE be pleased to state:

(a) whether Government are aware that Heliothis and white fly pests, which affect cotton crops, have developed resistance to pesticides as a result of which cotton crop worth millions have been destroyed;

(b) if so, the details thereof; and

(c) the steps taken to check this menace?

THE MINISTER OF STATE IN THE DEPARTMENT OF AGRICULTURAL RESEARCH AND EDUCATION IN THE MINISTRY OF AGRICULTURE (SHRI HARI KRISHNA SHASTRI): (a) Yes, Sir. The development of insecticide resistance has been observed in Heliothis there is no evidence so far of resistance in white fly pest, infesting cotton.

(b) The resistance to cypermethrin (a synthetic pyrethroids) was noticed up to 164 and 300 folds in the Heliothis larvae collected from cotton fields in Guntur (Andhra Pradesh) and Juzurru (Near Vijayawada, Andhra Pradesh), respectively. The population collected from chickpea and pigeonpea fields from both the places was, however, not found to be resistant. Heliothis population collected from chickpea field from Karnal also showed low degree of resistance to cypermethrin. White fly is a common pest of cotton, but no insecticide resistance has yet been reported in this insect.

(c) Integrated pest control measures have been developed which include the use of less susceptible cotton varieties, crop sanitation, use of biological agents, proper cultural practices, and only the need based use of
